

AFTAC

AI ML Accelerator Charter

The AFTAC AI Accelerator is chartered to ensure that Machine Intelligence (MI)—by which we mean highly autonomous systems achieving human levels of performance—benefits all AFTAC mission areas. Our primary mission is to accelerate Center-wide adoption of MI, to automate repetitive and/or labor intensive tasks and to free human capital for the performance of more exquisite analysis. To that end, we commit to the following principles and activities:

- **Synchronizing Center – wide MI**
- **MI Sprint Teams**
- **Deliver Mission Value**
