Vice Chief to Soldiers: 'I'm trusting you'

WASHINGTON — Army Vice Chief of Staff Gen. Christopher C. LaNeve urged Soldiers to master their military occupational specialties and adopt a "warrior mindset," as outlined in the Army Azimuth. Reflecting AUSA's theme, "America's Army: The Foundation of the Joint Force," he said the Army's ability to maneuver on land creates dilemmas for adversaries and advantages for the joint force.

The Army's Strategic Capital Initiative

WASHINGTON — The Army is rewriting the playbook on how it partners with the private sector. At a contemporary military forum on the Strategic Capital Initiative during the Association of the United States Army 2026 Annual Meeting, senior Army leaders and commercial executives sent a clear, unified message: the Army is doing business differently than ever before.

Army modernizes dining to boost Soldier readiness

WASHINGTON — The Army is modernizing installation dining through Campus Style Dining Venues, Flexible Eating and Expanded Dining, and commercial partnerships. Discussed during an Association of the U.S. Army panel on warfighter performance optimization, the effort separates garrison dining from tactical field feeding—improving Soldiers' access to balanced nutrition.

AMCOM, CCAD, LEAD showcase depot capabilities

WASHINGTON — The U.S. Army Aviation and Missile Command, alongside Corpus Christi Army Depot and Letterkenny Army Depot, showcased how advanced manufacturing, digital scanning, data-driven systems and artificial intelligence are modernizing organic sustainment for an expeditionary, globally deployed force during the Association of the U.S. Army Annual Meeting and Exposition.

Detroit Arsenal tests 3D-printed building 'armor'

DETROIT ARSENAL, Mich. – Detroit Arsenal is hosting a revolution in manufacturing. The installation is piloting a pioneering facility modernization project that uses state-of-the-art 3D-printing technology to install a high-efficiency exterior "armor" around its buildings. Using this, the Army aims to slash building heating and cooling energy consumption by more than 65%.

CECOM hosts its first panel on 'Vibe Coding'

ABERDEEN PROVING GROUND, Md. — Modern warfare is now defined by software, where milliseconds in code execution can determine mission success and survivability. To examine how artificial intelligence is transforming software development, Communications-Electronics Command Army Software & Innovation Center hosted its first technical panel.
