Army hosts first OIB Workload Summit

WASHINGTON – In a decisive step toward strengthening the nation's defense readiness, the Army hosted the first Organic Industrial Base Workload Summit, representing a critical milestone in aligning workload capacity, modernization efforts and immediate readiness across the service. This marked the first time the Army brought the acquisition, sustainment, resourcing and staff communities.

Acting SECARMY: 'Pit crew of the American Warfighter'

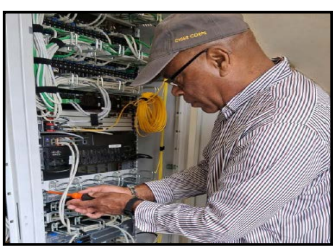
ANNISTON ARMY DEPOT, Ala. – Anniston Army Depot's role in keeping Army combat vehicles and small arms ready for the fight took center stage during an Oct. 23 visit by Acting Secretary of the Army Adam R. Telle, who called the depot critical to national defense and military readiness. He was joined by Congressman Mike Rogers, chairman of the House Armed Services Committee.

Fort Stewart FMWR FEEDs the warfighter

FORT STEWART, Ga. — Soldiers at Fort Stewart used their meal entitlements, Oct. 26, at Club Stewart as the installation's Directorate of FMWR joins the Army's Flexible Eating & Expanded Dining program. FEED is a pilot program overseen by Army Materiel Command that launched Aug. 3 on Fort Stewart and allows Soldiers to use their daily meal entitlement for select meals at approved dining spots.

Army's push to print its way back into the fight

WASHINGTON - Facing supply chain bottlenecks in an increasingly contested logistics environment, the Army is turning to advanced manufacturing, additive technologies, and innovative partnerships with academia and the DIB to get broken equipment back into the fight faster. -- advanced manufacturing is no longer a futuristic concept, but an operational neccesity driving frontline readiness.



Modernizing Army network for decision dominance

ABERDEEN PROVING GROUND, Md. – In the multidomain operational environment, the speed and resilience of the Army's network are fundamental to its lethality and readiness. To maintain decision dominance, the Army is executing a historic, globe-spanning modernization of its digital infrastructure. -- This ensures that the Army's warfighters are backed by a resilient, secure digital backbone.

IAAAP shares Lead Azide detonation information

MIDDLETOWN, IA. - The Iowa Army Ammunition Plant, hosted an informal open house and welcomed nearly 200 residents and community leaders to share the most recent information about the planned controlled detonation of lead azide that will occur at IAAAP. The event demonstrated the Army's commitment to maintaining open and transparent communication with the American people.
