Watervliet Arsenal expands manufacturing capability

WATERVLIET ARSENAL, N.Y. — Watervliet Arsenal is expanding manufacturing capabilities through lights-out machining, using automation to increase available production capacity and strengthen its ability to respond to the Army's evolving cannon requirements. This strengthens the Army's organic manufacturing capability and support a more responsive and resilient domestic industrial base.

CCAD modernizes for the future

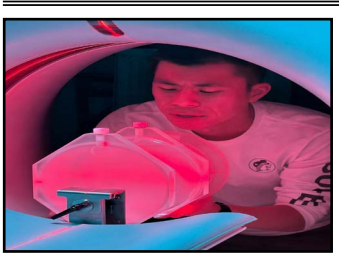
CORPUS CHRISTI, Texas — Corpus Christi Army Depot, the world's largest rotary-wing repair and remanufacturing facility, is set to undergo major infrastructure and technological upgrades as a primary beneficiary of the One Big Beautiful Bill Act. The primary emphasis for the funding is establishing foundational physical and digital infrastructure within the depot.

Fort Greely builds mobile 'shop-in-a-box' for arctic repair

FORT GREELY, Alaska — When heavy equipment breaks down at Fort Greely, transporting it to a maintenance facility is not always possible. Machinery may fail miles from a repair bay during prolonged darkness and temperatures colder than 30 below zero. The division responded by designing and fabricating a mobile, multifunctional field-repair trailer that brings essential shop capabilities directly to the point of failure.

New barracks facility opens at Camp Humphreys

CAMP HUMPHREYS, South Korea — Garrison leaders, project partners, and future residents gathered Nov. 4 for a ribbon-cutting ceremony to officially open Barracks Building P-6852, a modern facility designed to enhance Soldier quality of life and operational readiness. The five-story building features 302 private bedrooms, 151 shared kitchens, and laundry facilities on every floor.



AMLC supports joint force through quick-turn repair

FORT DETRICK, Md. – A specialized team of U.S. Army medical maintenance technicians deployed to the USAFRICOM AOR, restoring a critical imaging device for a joint force partner to full operational status in under 24 hours. Building on the mission success, leaders are now looking to solidify a long-term sustainment relationship through a formal maintenance support agreement.

92G MOS renamed as Tactical Field Feeding Specialist

FORT LEE, Va. – The U.S. Army Quartermaster School's Joint Culinary Training Department held a ceremony Oct. 30 at the Tactical Field Readiness Training Center on Fort Lee signifying the renaming of the 92G military occupational specialty from culinary specialist to tactical field feeding specialist. The change comes as the Army transitions to planning and conducting LSCO in contested environments.
