22-024	Sparacino, Ryan	My firm, along with Willkie Farr & Gallagher LLP, represents over 700 American veterans, civilians, and their families in connection with deaths and injuries caused by terrorists in Iraq. On behalf of our clients, we filed a lawsuit against the Islamic Republic of Iran, alleging that Iran and its agents provided material support and resources to terrorists who killed or wounded our clients (the "attack victims") in Iraq. See Martino et al. v. Islamic Republic of Iran, Docket No. 1:21-cv-01808 (D.D.C. Jul. 07, 2021) ("Martino"). As part of our investigation of these allegations, and on behalf of our clients who have made great sacrifices in connection with America's involvement in Iraq, we submit this request ("Martino Request"). For each Attack listed in the attached chart ("Attachment A: Attack Victim List"), we request any and all related formal or informal reports, records, files, products, investigations, memoranda, summaries, related correspondence, or other documents, including but not limited to: a. JIEDDO/JIDA/JIDO products or data entries pertaining to the Attack from CATAPULT, GLIDER, the RFS repository, other data repositories, or archives maintained by JIDO on their unclassified, classified, or coalition networks; b. Signature characterization of the IED used in the Attack; c. Tactical characterization (Tactical Design and Purpose of Device) of the IED used in the Attack; d. Technical characterization (with emphasis on the main charge configuration) of the IED used in the Attack; e. SIGACT Reports pertaining to the Attack generated at the Battalion, Brigade, Division, or Multi-National Force-Iraq (MNF-I) level; f. Explosive Ordinance Disposal (EOD) Reports or Storyboards pertaining to the Attack; g. Weapons Intelligence Team (WIT) Reports generated by the WIT who investigated the Attack; h. TEDAC Forensic Reports pertaining to the Attack; i. Task Force Troy reporting and/or analytic products pertaining to the Attack; j. Combined Information Data Network Exchange (CIDNE) entries pertaining to the Attack; k. Request for Support (RFS) products generated as a result of the Attack; l. IED or other explosives/weapons Reports; m. IED-Event or other explosives/weapons Storyboards. For each Attack victim in the attached chart, we include one blank cell for the Agency to assign a FOIA number for the request, and we request that each FOIA number be included in the Agency's reply. The attached charts include the following information regarding each Attack victim and pertinent Attack: Last Name First Name Rank Branch or Employer Company and Unit Date of Incident Location of Incident	Granted/Denied in Part	Closed	01/13/2022

22-034	Carter, Elliott	This is a request under the Freedom of Information Act, for all records related to the Capitol Visitor Center. (DTRA's involvement in the visitor center project in the period	Other Reasons - No records	Closed	02/15/2022

		Immediately after 9/11 was noted repeatedly in contemporary Congressional hearings.) Suggested search parameters include the following: Keywords: "Capitol Visitor Center," or "CVC," or "Architect of the Capitol" Likely time period: 9/11/2001 - 9/11/2003 If these search parameters are likely to yield a very large number of records, I would welcome the opportunity to discuss ways to target it more precisely. For example, narrowing the time period would certainly be an option if justified. If there are any fees with the fulfillment of this request I would like to respectfully ask for a waiver as a member of the news media. I am a writer affiliated with several info-disseminating organizations including the Washington Post, and Georgetown University Press. I plan to use these records in that editorial capacity to help expand public understanding of government activities. If there are fees, and my waiver is denied, please let me know by email before charges are incurred.

22-047	Kline, Adam	Under the Freedom of Information Act, I would like to request the following record: The DTRA "in-depth stochastic modeling" analysis regarding the U.S. airstrike on March 17, 2017, against two ISIS snipers on a building in the al Jadidah District in Mosul, Iraq. The airstrike resulted in substantial civilian casualties. The modeling was cited as Exhibit C18 in a military report that stated that DTRA "in-depth stochastic modeling of the engagement predicted the structure would suffer no more than 16 to 20% damage." The modeling also "predicted that the damage would be primarily contained to the roof and second floor of the northern portion of the structure" (see: Caution- https://int.nyt.com/data/documenttools/c-3-17-17-iraq/4fd4000fcb95a110/full.pdf < Caution- https://int.nyt.com/data/documenttools/c-3-17-17-iraq/4fd4000fcb95a110/full.pdf > , pages 10-11 of the PDF). This modeling would have been prepared and provided to Army investigators no later than May 6, 2017, and may have been titled "ATO FX Engagement 4250.10 Attack Analysis" (see: Caution- https://int.nyt.com/data/documenttools/c-3-17-17-iraq/4fd4000fcb95a110/full.pdf < Caution- https://int.nyt.com/data/documenttools/c-3-17-17-iraq/4fd4000fcb95a110/full.pdf > , page 45 of the PDF). Please release all reasonably segregable nonexempt portions of this document, and please review any classified information for declassification. If you regard this document as potentially exempt from disclosure requirements, I request that you nonetheless exercise your discretion to disclose it, in accordance with Attorney General Merrick Garland's March 15, 2022, FOIA guidelines (Caution- https://www.justice.gov/ag/page/file/1483516/download < Caution- https://www.justice.gov/ag/page/file/1483516/download >). 22-014	Durkin, Allison	Government use of DNA technology has become of vital interest to the public. The critical nature of this information is embodied by the National Research Council's 2009 landmark report on forensic evidence; the President's Council of Advisors on Science and Technology 2016 report on forensic science, and the National Institute of Standards and Technologies' 2021 report on DNA mixtures. I seek records to shed light on the development and use of a recently developed InTechnology, which predicts human features from DNA, called forensic DNaphenotyping ("FDP"). I request that a copy of the following documents be provided to me 1. With regard to Parabon NanoLabs Inc. ("Parabon"): a. Documents showing the amount the Department of Defense ("DoD") has awarded to Parabon with respect to its Snapshot Kinship Inference ("Snapshot") tool; b. Documents showing the amount the DoD has awarded to Parabon in total research grants or contracts; c. Documents showing the amount the DoD has paid to Parabon for use of its services; d. Any contracts, memoranda of understanding (MOUs), or other documents describing or memorializing the nature of the DoD relationships with Parabon; e. Documents describing Parabon's research abstracts, research proposals, and research findings; f. Any documents describing or memorializing whether Parabon may use samples the DoD submits for research purposes; g. Documents describing the proposed and existing case acceptance policies for sending samples to Parabon, including case type, minimum amount of DNA, and policies related to mixed samples; h. Documents describing the services Parabon conducts for the DoD including the features Parabon predicts; i. Documents showing the number of instances in which the PD has used Parabon's services; j. Documents showing the number of instances in which the PDhas used Parabon's genetic genealogy services; and k. Documents showing the number of instances in which the PD has used Parabon's Snapshot services. 3. With regard to other companies, organizations, or researchers engaged in forensic DNA phenotyping/prediction of human externally visible characteristics ("FDP organizations"): a. Documents showing the names of FDP organizations whose research the DoD has sponsored; b. Documents showing the amount the DoD has awarded to FDP organizations in total research grants or contracts; c.
