32nd MAU works round clock clearing explosives in Beirut

by Corporal Chuck Jenks Marine Combat Correspondent

BEIRUT, LEBANON - Rugged, majestic mountains tower over the city only a short distance from downtown majestic mountains tower over the city only a short distance from downtown Beirut. These ancient wonders of nature stand in sharp contrast to the rubble and shattered skyscrapers of West Beirut. This port city is still shrouded in the smoke and smell of death that has plagued Lebanon for the last seven years. It's a situation that's not lost on the U.S. Marines based here as part of the multi-national peacekeeping force. Unfortunately, they don't have much time to dwell on contrasts. This devastated capital is strewn with deadly, unexploded ordnance. Combat engineers of the 32nd Marine Amphibious Unit and their infantry escorts are working from mid-East sun-up to sun-down clearing the explosives in an effort to make Beirut safe for both Lebanese and foreign forces. Landmines are their first priority.

"We've heard there are lots of mines still in the city and outlying areas," said Sergeant John Selbe, of the Mine Detection Team. A member of his unit, Corporal David L. Reagan, was killed Sept. 30 while helping with this

"We've all been briefed to expect to find many different types of mines from all over the world," Selbe said. The Mine Detection Team, which recently arrived in Beirut to help with

explosives-clearing operations, is composed of Marines from Bravo Company, 2nd Combat Engineer Battalion, based at Camp Lejeune, N.C.

"We came to Beirut with three sweep teams," continued Selbe. "Each of these teams is equipped with metallic and non-metallic mine detectors. The operator listens to the tones on a high-pitch headset. We are careful to keep Marines working on the headset for only 10 minutes because after listening to the tones for awhile, it's easy to get tone deafness. That's dangerous. If you miss the tone change, you miss the mine. That can cost you." cost you

Non-metallic mine detectors can locate large, dense objects below the surface. They've been invaluable in Lebanon.

"We had to clear the beach one day and we found the metallic detectors useless because of the amount of metallic debris lying on the beach," said Selbe. "We switched to the non-metallic detector and ended up finding a lot of each carae which we had to dig a lot of soda cans which we had to dig and probe for," he said. While digging up debris has been an aggravation for the Mine Detector Team, the engineers can't afford to ignore it. "You can't try to second guess what's under there," oncluded Selbe. "If you do and you're

wrong, it's over." The Mine Detector Team in Beirut is made up of three li-man squads. There is a detector operator, two marking and taping men, a prober who marks the exact location of a mine, and a Marine with a grappling hook for setting mines off in place. The remainder are extra operators and security people. "T m an instructor at the mines and

demolition range back at Camp Lejeune and I'm confident that what I commented Selbe. "With the countless hours I've drilled information about hours I've drilled information about mines and explosives into their heads. I am sure these Marines will be as careful as possible. They realize they can't be too careful out in those minefields." That opinion is shared by younger Marines involved in "the real thing" for the first time. "We have never done this for real before," said Corporal Mike Stacey, who mans a grappling-hook in the

before, said Corporat Mike Stacey, who mans a grappling-hook in the mine-clearing squad. "The training we had makes me confident we can handle our mission in Beirut. Actually, it's the most exciting thing I have done since I have been in the Marine Corps."

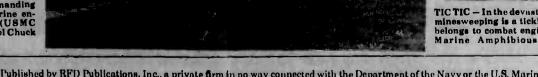

Once the engineers have located a mine or at least an object they think is a mine, they mark it with a cross of tape or a helmet-shaped plastic dome. Then the prober goes into action. His job is to locate the object by gently prodding the earth with a bayonet or a sharpened stick. When he finds it, loose sand and debris is carefully cleared. Once a mine is exposed, an Explosive Ordinance Disposal (EOD) team is called to destroy the ordnance in place or take it away to study.

minesweeping is a ticklish chore. The job belongs to combat engineers of the 32nd Marine Amphibious Unit who use

electronic mine detectors that work much like civilian-style metal detectors. (USMC photo by Cpl Chuck Jenks)

MINE SWEEPING - Scattered debris and other refuse made sweeping beaches outside Beirut a demanding job for Marine en-gineers. (USMC photo by Cpl Chuck Jenks)

Navy chaplain feels he's in right place at right time

by Capt Stuart Wagner Marine Combat Correspondent

BEIRUT, Lebanon — As a Catholic priest, Father George Gunst has always dreamed of visiting the Holy Land. His dream has come true, but he doesn't have much time for sightseeing. There are too many American sailors, Marines and Lebanese civilians who need his attention in this tension-filled mid-East capital.

tension-filled mid-East capital. That makes Father Gunst glad to be a Navy Chaplain. "I feel I'm in the right place at the right time," he commented. "We are serving a good purpose over here," continued the Chaplain for the 32nd Marine Amphibious Unit which is serving as the U.S. contingent to the multi-national peacekeeping force in Lebanon.

"We are very much needed. I talked to several local people who came up to me during the beach landing. They all said 'Now that you are here, we can rebuild. Now that you are here, it is safe to go back to our homes. We are not

afraid anymore." In his religious role, Father Gunst has more contact with the Lebanese than most Americans. He says they see the Marines as an effective deterrent to any army that may want to wage war in Beirut. "They look at the Marines as a force that will allow them to begin to get things back to normal," he continued.

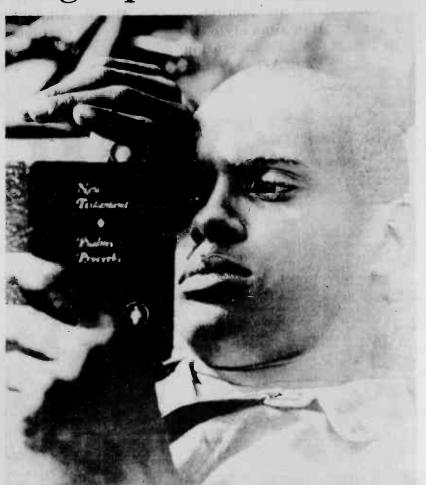

First on Father Gunst's mind, however, is the welfare of the Marines and sailors who are standing duty so rebuilding can begin. "Seeing as many Marines as possible is my goal," he said. That's not been easy with troops dug in throughout the rubble that mars Beirut's streets.

"Transportation is very critical," hesaid. "During ourstay in the Beirut port. Sergeant Mark Lehnan, my assistant, got us a forklift to get around. He is a former heavy equipment operator, so he's handy with that sort of thing. We drove to the different positions bringing that personal touch." Some of the Marines now call the busy pricest "the Combat Chaplain."

"I guess that is because I have been out with them when they have been walking post," he said. "Talking to them makes them feel important — which they are, of course."

The effect of constant tension is something Father Gunst understands.

"It is pretty tough standing a six hour watch with not much happening," he said. "We walk around particularly just after dark to make our presence known. Thank God we have not had any hostile fire. I'm glad Comhat Chaplain is a nickname and not a fact."

(left) — Catholic Chaplain Father George Gunst uses whatever altar he can find among the rubble of Beirut to bring religious services to the men of 32nd Marine Amphibious Unit. (USAF photo by SSgt. Jim Walker) (above) — When Father Gunst is not around, Marines like Private First Class Bruce Summers of Foxtrot Company, 2nd Battalion, Eighth Marines consult the Bible for inspiration. Show goes as planned

Angels perform for thousands

Story and photos by Sgt Pepper Davis

The expression "Don't rain on my parade" could have been paraphrased to "Don't rain on my Open House", as storm clouds threatened to halt the air station's Open House "House "House Amount Open House/Blue Angels performance Saturday and Sunday. Friday's dress rehearsal, which

Friday's dress rehearsal, which was to have been seen by a special audience of 2,700 people, was canceled because of continuing rain. As the downpour eased, approximately 750 people came to the Open House. McDonald's of Hawali, Coca-Cola, Frito-Lay, Pepsi Cola and Dole Pineapple Corp., were at first prepared to serve refreshments to the larger group. Since the Angels' performance was called off, those organizations turned the Open

organizations turned the Open House into a free party, with food for everyone. There was some concern that

There was some concern that the weekend's activity would not get off the ground, but the rain never returned. The show went on as planned, much to the delight of the 75,000 (total) spectators who turned out to witness the breath(aking antics of the Navy's famed precision flying team. The Open House also included static displays of Marine included static displays of Marine weaponry, alrcraft, and equipment. Saturday's schedule was

highlighted by the appearance of Tom Selleck, star of television's "Magnum P.L."

As a prelude to the main attraction, Brigade Marines from Company A. 3d Reconnaissance Battalion; Motor Transport Company, Brigade Service Support Group; Marine Fighter Attack Squadron-235; Company B, 1st Battalion, 3d Marines; Marine Heavy Helicopter

Squadron-463, Marine Medium Helicopter Squadron-265, and Headquarters and Maintenance Squadron-24, all chipped in to demonstrate a heliborne assault.

demonstrate a heliborne assault. When the moment arrlyed for the Angels' performance, anticipation mounted. As the aerobatic artists soared through their manuevers at speeds in excess of 500 miles per hour, the spectators watched with amazement, and responded with thunderous upplause.

thunderous upplause. Some routines required the pilots to pass within inches of each other at tremendous speeds. Precision took a whole new meaning as the Angels spiraled and twisted their way through such stunts as the Knife's Edge. the famous Blue Angels Diamond, the Star Burst, and the Pass in Review.

At the end of the show, the pilots talked with spectators and signed autographs.

Uniforms must be officially approved by the Marine Corps

In some cases, even items which

In some cases, even terms which may appear squared away – no Irish pennants, frays, or stains, for example – won't pass. The reason: they have not been officially approved by the Corps. There are four ways to buy uniform items that ensure the items are approved, according to the Marine Corps Uniform Board. Buy from the Marine Corps Supply System. All system items with "NSNs" on the inside are approved. The only care you must use here is to wear the item as prescribed in the Uniform

Regulations. Buy from the Marine Corps Exchange System. All uniform items sold by exchanges are

All insurance plane welcom

Marine Corps approved. When you buy the item, you will see a "Marine Corps approved label" on the inside. This is what it looks

This label protects you in two

ways: First, it will convince any inspector, from your NCOIC to the

Inspector General, that your uniform item is approved for wear. Second, if a uniform manufacturer

fails to meet Marine Corps quality

control standards, his approval number can be revoked. If you

think a uniform item isn't up to specifications, you should report the purchase of defective clothing

Uniform

Buy your uniforms from a civilian source, but he sure to look for the Marine Corps approval label found in Exchange System uniforms. If someone tries to sell you a uniform claiming that it's "Just as good — or better" than approved items — be suspicious and ask to see the approval label. If it's not there, you're buying that uniform at your own risk, and it won't pass inspection. If you buy

Patient Education

An interview with Dr. Lynn France, optometrist, NRMCL Hi.

GLAUCOMA CATARACTS

Question. Will you please tell us what these diseases are? Answer. Although there are many various

Answer, Aknown there are many various types of glaucoma, the disease is generally an increase in the fluid pressure in the eye with associated changes in the optic nerve and characteristic visual field losses. A cataract, on the other hand, is not a disease

or growth, but rather an opacification of the crystalline lens of the eye and usually results from the aging process. However, some cataracts are caused from injury, toxic substances, irradiation, or metabolic disorders, or may be present from birth as congenital cataracts Question. How do these diseases cause loss

of eye sight?

Answer. The elevated fluid pressure of glaucoma can cause less blood to flow to the optic nerve and this causes the nerve fibers vital for sight to deteriorate. If left untreated, glaucoma causes a gradual loss of peripheral vision, eventually leaving the person with "tunnel vision" or total blindness. Cataracts, on the other hand, usually do not damage other parts of the eye, but the opacification or clouding over of the lens in the eye blocks images from reaching the retina where the images begin to be processed for "seeing."

"seeing." Question. Can they be prevented or cured? Answer. Glaucoma, though not preventable, can be well controlled in most cases and visual can be prevented if glaucoma is detected early. Generally, cataracts are part of the natural

Generally, cataracts are part of the natural aging process and are not preventable. Question. Can loss of sight from either of these diseases be regained? Answer. Once visual loss has occurred from glaucoms, the amount of vision lost cannot be regained. With cataracts, vision may be restored by surgical removal of the cataract followed by a lens implant, or various methods of onticel correction. of optical correction.

Question. Are there any physical conditions that aggravate either one of these diseases? Answer. There are certain physical conditions such as diabetes or other vascular diseases which could aggravate glaucoma and

cataracts, but we are also concerned with factors that may increase the risk of getting the disease in the first place. Patients with a family history of glaucoma or those with diabetes or who are highly nearsighted may never get glaucoma, but tend to be at a higher risk of getting the disease than those without such risk factors. Cataracts may be associated with people who have diabetes, but usually are part of the neutral aging process

people who have diabetes, but descent of the natural aging process. Question. Is there anything people can do to avoid complications from glaucoma or

cataracts? Answer. The best way to avoid complications with any eye problem is to have regular eye examinations and follow the advice of your doctor carefully. Question. Do people ever have both conditions at the same time? Answer Yes some nearly may have

Answer. Yes, some people may have glaucoma and cataracts at the same time, but having one certainly does not mean you will

have the other

Question. How often should people have check-ups for the purpose of detecting these conditions?

Answer. A yearly, comprehensive eye examination is recommended and this examination should always include a glaucoma test and screening for any disease of the eye or other eye related health problems.

Question. Are these any symptoms associated with either so that a person afflicted with one or the other could recognize it and seek medical attention?

medical attention: Answer. With open angle glaucoma, there are essentially no symptoms in the early stages and the person's visual acuity may still be excellent. This is why the pressure test is so important for early detection. In cases of extremely high pressures, a person may experience intense, painful throbbing in the eye, along with steamy or cloudy vision. But again, there are usually no symptoms in the early stages of glaucoma.

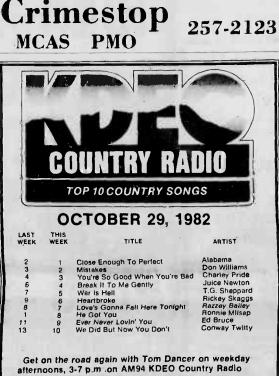

With cataracts, the principal symptoms are painless, progressive loss of distant vision and glare or dazzle from bright lights caused by the tendency of the opacities to scatter light within the eye. Sometimes a person may also notice his

the eye. Sometimes a person may also notice his reading or near vision seemingly improving in the eye that has the cataract. Question. Why can't the Navy at Pearl Harbor Clinic provide eye exams for dependents? Answer. The clinical mission of the optimetry clinic at Pearl Harbor is to support members of the Pacific Fleet Forces in the form of eye examinations and corrective spectrales. Aside from routine examinations, active duty personnel may also require special eye

examinations as in the case of those who work with ionizing radiation. Care of dependents and retired personnel is provided on a space available basis and since the patient load of active duty personnel is so great here in Hawaii, we are very limited in the time available to see non-active duty patients.

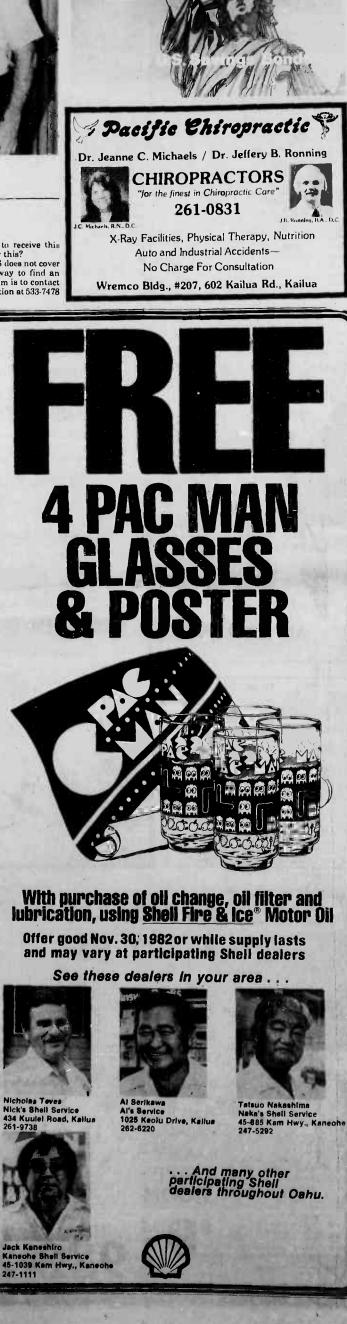

for referral

Question. Where can 1 go to receive this exam? Can CHAMPUS pay for this? Answer. To date CHAMPUS does not cover general eye exams. The best way to find an optometrist to go to for the exam is to contact the Hawaii Optometric Association at 533-7478 for referred

GySgt Devil Dog Torres

Hardcharger legally changes first name to Devil Dog

Story & photo by SSgt Moses Reynolds

SSgt Moses Reynolds CAMP H.M. SMITH, Hawaii — For most people, the sweetest sound to the ears is one's own first name. Not so for Marine Gunnery Sergeant Genaro Torres.Jr. — he'd rather be called Devil Dog! Headquarters Marine Corps recently approved his request to change his first name. "Now my name is legally Devil Dog." growled the 34-year-old motor transport chief here. Torres went through the painstaking process of petitioning the state of Hawaii to change his name. The final step to change his name. The final step or paw print was when the lieutenant governor signed the decree.

The name switching was not a spur of the moment urge. It is not a hoax. There was never a bet made. He is as serious about his new name as he is about his crisp

uniform and seemingly lough as a leather dog leash. He's notorious for correcting Marines' appear-ances in or out of uniform here. However, he's a lo friendlier than

the gruff image he projects, "Changing my first name is just my way of holding on to a bit of Marine Corps history," said the 14-year veteran. "We (Marines) all carry some kind of tradition wherever we go. 1 guess 1 carried mine just a step further."

"These days, I believe the term devil dog has come to mean one who is a hardcharger dedicated to Corps and country and continu-ously sets an example of the highest degree of professionalism," said the Bronx, New York City native. He was born in Ponce,

Puerto Rico, but calls New York City his home

Living up to the 'devil dog' has not been very rough for this native New Yorker. He has never feared being disliked by others. "It all started after boot camp; I was nicknamed Devil Dog because of my enthusiasm and aggressive-ness. Somehow, I've maintained those qualifies since." those qualifies since

Tores credits his family for the successful tours in the motor transport field and on special duties. "My wife Josie and our three children have stood by meat all times. Most especially when 1 was a dwill instructor at Parris was a drill instructor at Parris Island."

He also credits much of his enthusiasm to his two brothers,

one of whom is an officer and the one or wnom is an officer and the other a staff noncommissioned officer. He also has a sister who is a corporal. "You can say we are a Marine Corps family," he smiled. "I'm happy and proud to know my family has accepted my decision to change my first name". to change my first name

Reaching the pinnacle of the enlisted ranks, that of becoming a sergeant major, is one of Torres' ambitions. "That shouldn't be too difficult; I've been selected for master sergeant and will

redesignate to first sergeant when

And if that's not enough, Torres has plans to embark on other "exciting careers" after retirement; perhaps attend the FBI Academy to qualify as a special agent or "whatever comes

up challenging or adventurous." Whatever Torres plans to do for the rest of his life, one thing will remain constant, his new legal first name — Devil Dog. A rare breed indeed.

Laundry man

Sexagenarian recalls life as soldier during World War II

Story and photo by Sgt Pepper Davis

"I was home on leaves "I was home on leave when my father heard the noise. He woke me up to find out what was happening, and I thought, They don't fire on Sundays." "I turned on the radio and heard them announce we were being attacked, and that all servicemen were to return to their units. They were bombing the hell out of us! As I drove past Wheeler (Air Force Base) I was srafed, and Wheeler was a mess. The planes were just like sitting ducks."

planes were just like sitting ducks." Arthur Camara was recalling his introduction to the America's prelude into World War II, the Japanese attack

on Pearl Harbor. He recollects those war-torn years with a fond bittersweetness. Camara remembers reporting back to his unit at Schofield Barracks the morning of the attack, and being shipped that afternoon to what was then Naval Air

afternoon to what was then Naval Air Station Kaneohe Bay. "We thought the Japanese were going to attack there again, so we waited for them on the beaches — for six months. They never came because they were turned back at Midway," he commented.

NOW, NEARLY FOUR DEcades later, after serving a hitch in the Army where he said he was usually "in the first group for just about everything," Camara works at the air station as a pickup and deliveryman for a local laundry, a business he has been in for more than 35 years. Born and raised on Oahu, Camara

was drafted one year prior to World War II. It was the first draft for the state and he was the ninth draftee. "I became a member of the "\$21 a month club," he explained. "That was our monthly pay, but after they took for laundry and insurance, we had only about 18 bucks to live on."

only about 18 bucks to live on." His unit, the 298th Infantry Battalion, was all Hawaiians. They were trained at Schofield Barracks and considered part of the National Guard until the onset of Pearl Harbor, then they were integrated into the regular Army.

regular Army. With the Japanese threat thwarted, the 298th was called back to

A CLEAN LIVING — Arthur Camara sorts through deliveryman for a local laundry, has been in the clothing between visits from customers. Camara, a cleaning business for more than 35 years. clothing between visits from customers. Camara, a former Army sergeant now working as a pickup and

Schofield. After awhile, 300 of the unit's soldiers - including Camara were selected to form a cadre to train paratroopers at Fort McCall, N.C. This marked the first time many of the Hawaiians had ever left the island, and Camara lamented that next few months were a cultural nightmare.

HE SAID THAT BECAUSE OF

Their dark complexions from suntanning, they were often snubbed, and sometimes met with violence. "Talk about fights! The para-troopers were insulted because we were sent to train them, and the people in town would just stare at us, not how how you are all they how knowing what we were. All they knew was that we were dark, and that was it." Although they wore unit patches on their uniforms, the townsfolk were

unimpressed, the common responses were: "I don't care. Get to the back of the bus anyway." Or just simply, "Get

"We couldn't get served in restaurants or clubs and everyday we were in fights. It got so bad, they (the command) had to split us up," he said. command) had to spit us up, he kaid. Camara ended up in Louisiana, but within a few days he was packing his duffel bag again. He was tabbed to go to the China-Berma-India Command in Kumming, China as part of the first group of American soldiers to ever train the Chinese with American

weapons. They had to sneak into China via India and Berma because the Japanese were literally all over the place. They had no protection as they crossed the Hymalayans, which was

considered the most dangerous air route of that en

HE SPENT TWO YEARS AT the CBI Command. During that time he said the Chinese "treated us like gods." gods." But they lived with the constant threat of a Japanese attack the The 1500 Americans were without a direct command. Camara said it was as if they were forgotten about. "We never got any promotions or pay raises. I sometimes got the impression we were sent there just to keep the Japa honest.

To add to their woes, supplies became something to only wish for. With the Japanese forces swelling rapidly around Kumming, the only supplies that were brought in was fuel for the famed Flying Tigers, Camara

1

said they went for months without soap or toothpaste, but he humorously recalled one moment when the soliders did get something for their loyalty.

"I remember one Christmas when we were each sent one can of beer — and someone stole mine!" Then came what they all feared. The Japanese had bullied their way

within 30 miles of Kumming, and an attack seemed inevitable. The only escape route was north toward Russia. Camara quipped, "All the time I kept thinking, "Boy! It's a long walk to Russia."" But the Japanese momentum was eventually stoned momentum was eventually stopped.

AFTER THE CBI TOUR, Camara added another first to his list: He was in the first group of soldiers to be discharged under the point system "Back then you got so many points for every place you went and things you did, and, if you were overseas you got more points. I spent most of my time overseas so I had a lot of points. You only needed 90 to get out, and I had 150

Upon his discharge he lingered in California for awhile. The war with Japan was still going on and even though he had honorably served his country, he was often mistaken for a draft dodger

In 1946, still trying to plot his course f life, Camara returned to Hawaii. With the help of a friend, he opened a laundry and dry cleaning business, but gave it up in 1979, opting to spend h is last working years in a less hectic position.

pickup and delivery job has him Hir up at 4:30 a.m., and at the air station two hours later, sitting in his familiar white truck waiting for business. He says the job is refreshing and gives him freedom, "I like my job. That's why I do it. I enjoy being outdoors moving around and meeting people. I could never work indoors he commented

AS FOR FULL RETIREMENT. he sexagenarian declared: Retirement is out of the question. Working keeps me young; it keeps me going. Sitting around watching TV is a sure way of killing yourself.

The Flag Football playoffs will be played at 4:45 p.m. Thursday and friday and at 3 p.m. on Sunday. The championship games will be played Nov. 10 at 1 p.m. and 2:15 p.m.

The Intramaral Basketball season has The Intramaral Bible Dati Beason has started and games will be played at Hangar 103 Gym during the following times: Tuesdays through Fridays at 5:30, 6:45 and 8 p.m.; Saturdays at 10 and 11:15a.m.; 12:30, 1:45 and 3 p.m. and Sundays at 5, 6:15, 7:30 and 8:15 p.m.

Tickets for the Hula Bowl are on sale at the Special Services ticket outlet

This was the "year of the surprise" In terms of football. From the National Football League strike right down to the Intramural Flag Football League on blase, the teams have been leaving their fans dumbfounded with their actions.

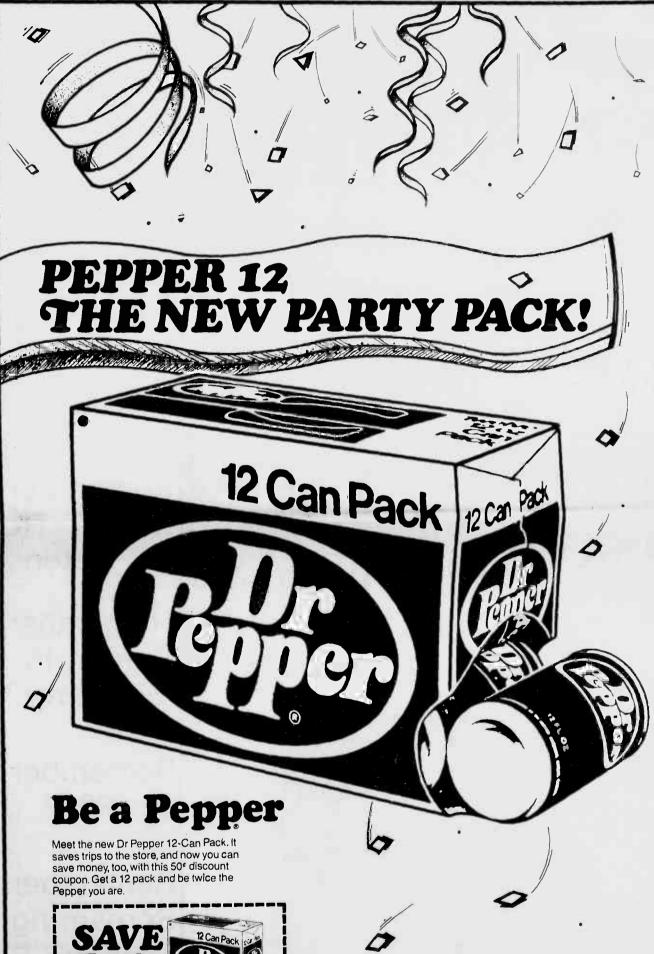

Take Supply Company, Brigade Service Support Group for example. They finished the National League tied for first place with a 10-2 record. But when they entered the first round of the double elimination play-offs, they lost to Marine Air Base

Squadron-24 in overtime. MABS-24

Four teams remain in playoffs

Squadron-24 in overtime. MAHS-24 just made it into the play-offs with a 6-5 record, and beat Supply 1-0. Supply Company moved into the lower's bracket only to be eliminated by Amtracs, a team who took half the season to find the endzone. Marine Air Control Squadron-2 could be well on their way to their fourth consecutive victory, first edging Amtracs 9-7, then handing MAHS-24 their first defeat 22-0. But, the team who has come along way is Marine Medium Helicopter Snundron-165. They won their first

game after only practicing together for three days after returning from deployment, and have been steadly winning ever since. After a 5-2 seeson '165 has downed Headquarters Company, 1st Marine Brigade 15-7 and then Headquartes Company, 1st Battalion, 12th Marines. Tonight MABS-24 and Station Operations and Maintenance Squadron will square off on the gridiron to fight for the fourth spot in the quarter finals. The game will be played at Station Training Field starting at 5 p.m.
