Coveted VPP Star Flag**

**Apprentice Class of 2020  
Graduates Honored**

**COVID-19 Response Team  
Recognized for Achievement**

## Captain's Corner

**Capt. Edward J. Robledo**  
Commanding Officer

As we approach the holiday season, I want to thank the TRF & NRMD-KB Team for all of your excellent work over these last couple of months! This has been a challenging year dominated by the COVID-19 pandemic and the associated local restrictions.

As we move forward into 2021, there's been encouraging news about vaccines to combat the virus and bringing some hope that we can move back to a "normal" life in the coming months.

Since the last newsletter, a lot has occurred on the Waterfront. The Team completed USS RHODE ISLAND and USS MARYLAND's Dry Dock REFIT periods, and successfully docked USS FLORIDA. Additionally, USS WEST VIRGINIA's modernization REFIT was completed along with some follow-up work on WEST VIRGINIA and USS RHODE ISLAND.

USS WYOMING completed her Engineering Refueling Overhaul in Norfolk, Va., and is now a Kings Bay asset! Finally, USS ALASKA is in the throes of completing the first SSBN Extended Refit Period here at TRF & NRMD-KB. The Team has been dynamic and has flexed to meet all challenges!

Phase A of the Dry Dock Recapitalization (DDR) project is well underway. Lots of temporary buildings are in place and our equipment is being moved to accommodate the Dry Dock overhaul.

As you may have noticed, parking has become a challenge on the Waterfront. We are working with SUBASE to im-

prove the situation to include shuttle services down to the Waterfront. As that process solidifies, we will keep the Team updated.

To that end, I have donated the TRF CO's Northside parking spot to Code 200 and the TRF XO/ED's parking spot in the South lot to Code 300 until January 1, 2021.

The Code 200 and Code 300 leadership will choose the most deserving employees to use those spots. After January 1, I'll reassign those parking spots to other Codes.

COVID-19 pandemic update. As I write this, our Nation is experiencing an alarming spike in positive COVID-19 cases.

I recently mailed out an update to all households to aid in understanding some of the terms and processes we use to determine when to quarantine/ROM an individual and/or when individuals can return to work. We MUST CONTINUE to follow CDC COVID mitigation processes and guidelines until we defeat this virus!

During the holiday season, and this season is no exception, large stressors in life are experienced by all. If you feel that your stress-levels are getting to be too much, please reach out for help! We are all here to support one another.

Thank you for all you have done to ensure the success of TRF & NRMD-KB! Enjoy the holidays and be safe!

**TRF-KB TEAM - FIRST LINE OF NATIONAL DEFENSE!**

## Shop 51A Earns CO's Safety Award

Shop 51A (Inside Electrical Shop) was recently named as the recipient of the Captain's Quarterly Safety Recognition Award, 4th Quarter, Fiscal Year 2020.

Of particular note, Shop 51A acquired and put into use a new and permanently mounted electric-powered steam cleaner replacing the old diesel fuel cleaner. This new electric cleaner eliminates the need for pallet storage, reduces congestion in passageways, and eliminates diesel fumes inside TRF's Repair Industrial Facility (RIF).

Additionally, Shop 51A had special boxes built to simplify the connection between motors and test equipment without creating ergonomic strain hazards. These boxes require less cable routing and set-up while improving safety, efficiency, and productivity. ~

**BRAVO  
ZULU and  
well done  
Shop 51A!  
SAFETY  
FIRST!**

# CMC's Message

First, I would like to thank everyone for the warm welcome I have received on my return to Kings Bay to serve as the TRF-KB Command Master Chief.

I'm excited to return to the area and have been made to feel right at home as I've settled in during the last few months. A special thank you to all those involved in making my transition from San Diego go smoothly.

I would like to take this opportunity to extend congratulations from all of us at TRF-KB/NRMD to our newest Chief Petty Officer Selectees! EMNC(Sel) Dylan Cleveland, MMNC(Sel) Christopher Diller, LSSC(Sel) Elena Merklings and TMC(Sel) Andre Robinson will soon pin on the coveted Chief's anchors! Well done Shipmates on this outstanding achievement!

Congratulations are also in order for our newest Senior Chief Petty Officers; TMCS(SS) Daniel Donaldson III and CSSCS(SS) Paul Tetreault who were promoted Sept 18. Congratulations on this career milestone for both you and your families.

Additional kudos go out to several of our TRF-KB Sailors for quarterly recognition and being selected as top performers among their peers. ND3 Matthew Bolt was selected as the TRF-KB Blue Jacket of the Quarter AND as

**CMDCM(SS) Jeff Hiscocks**  
*Command Master Chief*

the Blue Jacket of the Year! MM2 Kaitlin Baumann was recognized as the TRF-KB Junior Sailor of the Quarter and ND1 Stephen Schilz earned TRF-KB Sailor of the Quarter honors.

Again, congratulations to you ALL for these major accomplishments ... It's indicative of your consistent hard work and dedication. BZ Shipmates!!

I'd also like to commend all of the TRF-KB/NRMD Sailors and our civilians for your daily efforts in combating the COVID-19 pandemic. Unfortunately, positive cases are rising across the United States again, so we MUST NOT let our guard down.

Several base facilities have reopened and are strictly following current COVID 19 protocols. These facilities include the Rack and Roll Lanes bowling alley, Box Office movie theater, KB Finnegan's, MWR Tickets and Travel/Outdoor rentals offices, and Eagle Hammock RV Park is now accepting new reservations again.

I'm sure these facilities would very much appreciate your business.

**Continue executing our mission and thank you all for the contributions you make on a daily basis!**

## Winter Safety Message

This is the time of year we normally put out tips for home safety and holiday travel. This year is no different.

Who doesn't like fried turkey? Beware of the turkey fryer! Crisp, fried turkey may taste delicious, but splattered hot oil can easily start a serious house fire or burn anyone nearby.

In addition to the danger of oil splattering and igniting flammable objects nearby, the oil itself can overheat and catch fire. Do not overfill a fryer with oil (leave enough room to avoid spills when you add the turkey) and never put a frozen turkey directly in hot oil. Instead consider using an infrared fryer to safely cook your bird.

Before holiday travel make sure the maintenance is up to date and your vehicle is travel worthy. Check the oil, coolant and windshield washer levels, along with the windshield wipers and the tires for tread depth and pressure. Remember that driving around on summer tires here at home all year may be ok, but if traveling to a place where it snows, summer tires could possibly have you going over the hill and into the woods.

Avoid distracted driving, whether it is a holiday weekend or any time of the year. Nevertheless, the holidays do have a way of taking our minds away from common sense practices, like driving safely and responsibly. Even if your in-laws are calling and texting non-stop on the drive, ignore all distractions until you are able to safely pull off the road and respond.

Cell phones and holiday traffic do not mix, and no call or text is worth risking your life over. Download an app that detects phone movement. When the phone is moving more than fifteen miles per hour it will automatically send a reply message stating that you are driving and you will contact them when you stop.

When shopping for lights, electric decorations and extension cords, purchase only the ones that are UL-listed. If planning to decorate outdoors, make sure that you use lights and decorations that are rated for outdoor use. Using indoor-only products outside in the weather can result in electric shock and fire hazards. If you're in doubt

# TRIDENT Refit Facility, Kings Bay Marks Elite Safety Achievement

By Keith R. Boydston, TRF-KB Public Affairs

KINGS BAY, Ga. - The U.S. Navy's premier submarine maintenance and repair facility has joined an elite group of employers as one of the safest places to work in the United States.

TRIDENT Refit Facility, Kings Bay (TRF-KB) officially raised the Occupational Safety and Health Administration's (OSHA) coveted STAR worksite flag for the first time in a ceremony Sept. 18 recognizing the command's superior excellence in health and worker safety.

"This achievement is no small feat," said Rear Adm. John Spencer, Commander, Submarine Group Ten in his remarks during the ceremony. "And it is a direct reflection of your collective exemplary efforts. Everyone benefits from a culture of safety and I am proud of the TRF team for setting the standard."

OSHA's Voluntary Protection Program (VPP) STAR designation recognizes the exceptional efforts of TRF-KB and its employees while highlighting the command's comprehensive and successful occupational safety and health program.

"The true VPP Stars are the TRF-KB civilian and military employees who execute the mission of sustaining, repairing and modernizing the crown jewels of the military weapon systems, our OHIO-Class SSBN and SSGNs," said Capt. Ed Robledo, Commanding Officer, TRIDENT Refit Facility. "Our team is focused and committed to meet their operational mission while accomplishing the maintenance correctly, on-time, and most importantly, safely!"

Less than 0.1 percent of all employers in the United

States attain VPP STAR status, said Julie Dolson, Occupational Safety, Health and Environmental Director at TRIREFAC-KB. There are currently less than 1,400 Federal VPP STAR worksites within the U.S. and its territories.

"Being a VPP STAR site proves that we have an excellent safety culture from the deck plate to upper management," Dolson said. "This level of excellence is how we conduct business on a daily basis."

VPP participants are required to demonstrate an effective safety and health program and maintain injury rates below the national average for its industry.

TRF-KB started the VPP journey to achieve STAR status in 2013 with the goal to join the elite of our nation's industries, said Alan Heckman, a former OSH&E Director at TRF-KB and Dolson's predecessor.

Heckman and Dolson both played significant leadership roles on the long road to attaining OSHA's highest and most challenging safety achievement.

"Success in achieving VPP STAR status can be attributed to the culture of safety which was developed and expected through the years of working toward this milestone," Heckman said. "The hardest element to achieve; management, leadership and employee involvement, was embraced from the start and equally shared at all levels throughout the command."

Additionally, the countless hours the OSH&E staff and the command's Safety Committee spent on educating the TRF-KB work force on risk management and employee safety responsibilities were vital in reaching this landmark achievement.

# TRF-KB Celebrates Class of 2020 Apprentice Graduates

By Keith R. Boydston, TRF-KB Public Affairs

KINGS BAY, Ga. - TRIDENT Refit Facility (TRF-KB) recognized 40 apprentices from the Class of 2020 during a socially distanced graduation ceremony Oct. 9 at the command headquarters.

Amidst the challenges of the ongoing COVID-19 pandemic, and while observing recommended safety guidelines, the 25th TRF-KB apprentice graduation class celebrated the end of a demanding four-year training program that included more than 7,200 hours of college academic courses, specific trade-theory learning, and hands-on training designed to produce highly skilled and proficient journeyman-level technicians.

"The Class of 2020 graduates are the long-term foundational experts," said Capt. Ed Robledo, Commanding Officer, TRIDENT Refit Facility. "They will ensure TRIDENT Refit Facility continues to be the Nation's premier maintenance facility and support the National Defense Strategy of Nuclear Deterrence."

Established in 1990, the TRF-KB apprentice program has graduated 451 apprentice craftsmen in a variety of technical trades including Electrician, Marine Machinery Mechanic, Machinist, Pipefitter, Rigger, Tile and Plate Setter, Sheet Metal Mechanic, Painter, Fabric Worker, Shipwright, Instrument Mechanic, Rubber and Plastics Fabricator, Insulator, Shipfitter and Welder.

"The repair and maintenance of submarines is a huge

**KINGS BAY, Ga. - TRIDENT Refit Facility honored 40 apprentices during a graduation ceremony Oct. 9 at the command headquarters building. (Photo by Keith R. Boydston, TRF-KB Public Affairs)**

responsibility, but it's one these graduates have proven they can be entrusted with," said Sara Bennett, the Assistant Program Manager for the TRF-KB Apprenticeship Program and a former graduate of the program.

"Graduation is a doorway to a career path of your own design. Keep challenging yourself!"

Valedictorian honors for the class went to Amanda Phillmon and the class Salutatorian was Julio Martinez. Phillmon and Martinez both excelled in academics, trade theory courses, quarterly progress report grades and on-the-job tasks during their four years in the apprentice program.

Ed Robledo, Commanding Officer, TRIDENT Refit Facility (pictured right), presented the class Salutatorian award to Julio Martinez. (Photo by Kimberly K. Menzies, TRF-KB Public Affairs)**

# TRF-KB Apprentice Graduates (cont. from page 5)

For the class Salutatorian, hard work and self-improvement are keys to success.

"Find strength in the purpose of your being; through purpose derives passion and perseverance which lays the foundation you'll need to ensure the road to success," said Martinez. "Work relentlessly to become a better version of yourself than the day before."

Special recognition went to those apprentices who maintained a 4.0 grade point average during their college academic careers and included Amanda Phillmon, Julio Martinez, Michael Diaz, Nicholas Graham, Jacob Harlow, Christopher Kowal and Shawn Tittle.

Nine graduates also received the prestigious Steve Swan Memorial Award.

Established in honor of a former apprentice who graduated from the program at Portsmouth Naval Shipyard, "Swanny" served for many years as the TRF-KB Shop 38 General Foreman before he passed away in October 2014.

The award recognizes apprentices who exemplify the characteristics of Swan's leadership, his unmatched work

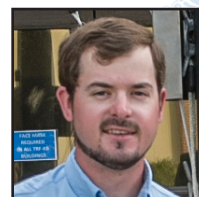

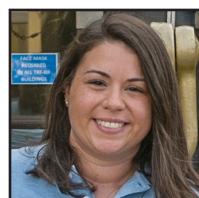

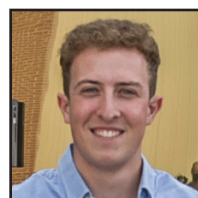

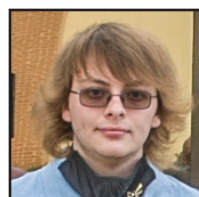

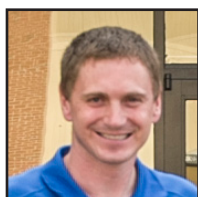

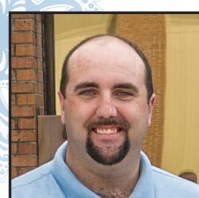

ethic, positive attitude and his insatiable desire to learn.

"If there was one thing he believed in, it was doing your best each and every day," wrote Swan's daughter, Hope Swan, in a Facebook post congratulating the 2020 graduates. "He is missed every day, but I love seeing him live on in so many ways, such as this amazing award."

The 2020 recipients of the Steven Swan Memorial Award were Amanda Phillmon, Julio Martinez, Robert Bruce, Hardy Jo Crews, Austin Allen Gay, Ryan Nolan, David Smith, Kurt Stronach Jr., and Robert Tuttle.

With the graduation of the 25th class of apprentices complete, the future of TRIDENT Refit Facility is in good hands and ready to welcome a new class of ballistic missile submarines later this decade.

"The civilian work force at TRIDENT Refit Facility is the long-term continuity and stability," Robledo said. "They ensure the OHIO-class SSBNs reach their end of life and allow for the transition to the COLUMBIA-class SSBNs." ~

# Shop of the Month

## **SHOP 56A** **Pipe and Flex Hose Shop** **Code 300**

Shop 56A, the Pipe and Flex Hose Shop, is comprised of 32 apprentices, mechanics, work leaders, and supervisors all working diligently to provide first time quality pipe and flex hose manufacturing and repair to our nation's ballistic and guided-missile Ohio-class submarines.

The shop manufactures, repairs and maintains a wide-range of shipboard piping systems including potable water faucets and large sections of Trim and Drain and hydraulics ranging from 1/4 to 6 inches.

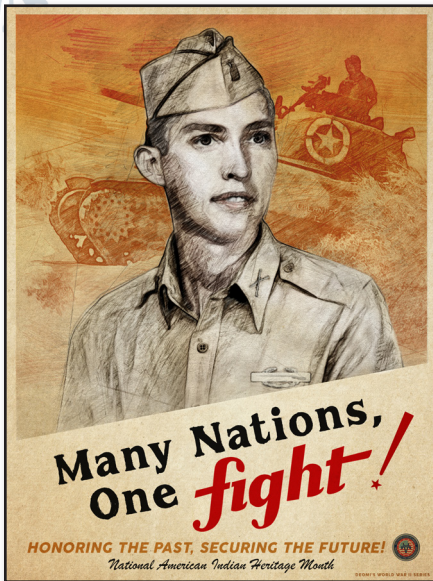

Shop 56A also plays a major role in the Ohio-class flexible hose manufacture and repair with hundreds of hoses, up to 10 inches in diameter, built and

hydrostatically tested each year.

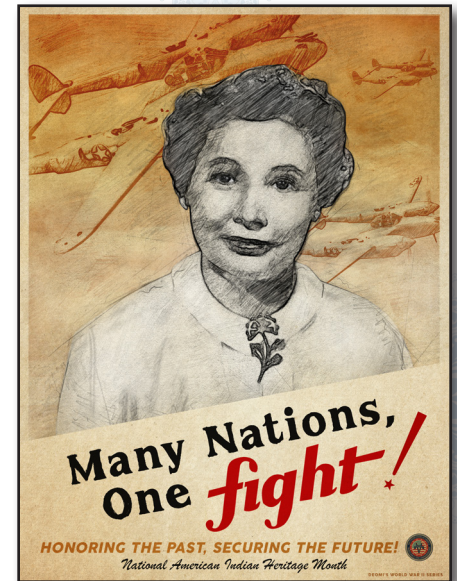

The shop's professional mechanics do more than just fit threaded pipe joints or glue plastic pipes like you might do at home, but they cut, grind and handcraft piping and components to machined tolerances, and target and fit complex joint designs for SubSafe/Level 1 systems for welding.

Additionally, the Shop 56A technicians silver solder braze pipe joints onboard submarines and across other areas of the TRF-KB Waterfront, soft solder periscope defects for X67A, and build, repair and replace Tank Level Indicators. Shop 56A - Always flexible! ~

## November is National American Indian Heritage Month

Since 1776, when General George Washington began enlisting American Indians for his Army, Navy and Marines; American Indians have contributed significantly to the defense of our nation.

During the Civil War, 20,000 American Indians served with Union forces both at sea and on the land. During World War I, although ineligible for the draft, 15,000 American Indians volunteered to fight in the Great War.

Although American Indians have been an integral part of our country long before its birth, American Indian veterans weren't awarded citizenship and voting rights until 1919. In 1924, voting rights were extended to all American Indians after the Snyder Act was passed.

In World War II, 44,000 fought with distinction, including 1,910 in the Navy and 874 in the Marines. For the Navy, two Oklahoma Cherokees distinguished themselves. Rear Admiral Joseph J. "Jocko" Clark commanded aircraft carriers and later a task force. Commander Ernest E. Evans was posthumously awarded the Medal of Honor for his actions during the Battle off Samar, Philippines.

Between 10,000 and 15,000 American Indians fought in the Korean War and more than 42,000 during Vietnam. In 1966, South Carolina Cherokee Boatswain's Mate 1st Class James E. Williams, while serving at South Vietnam's

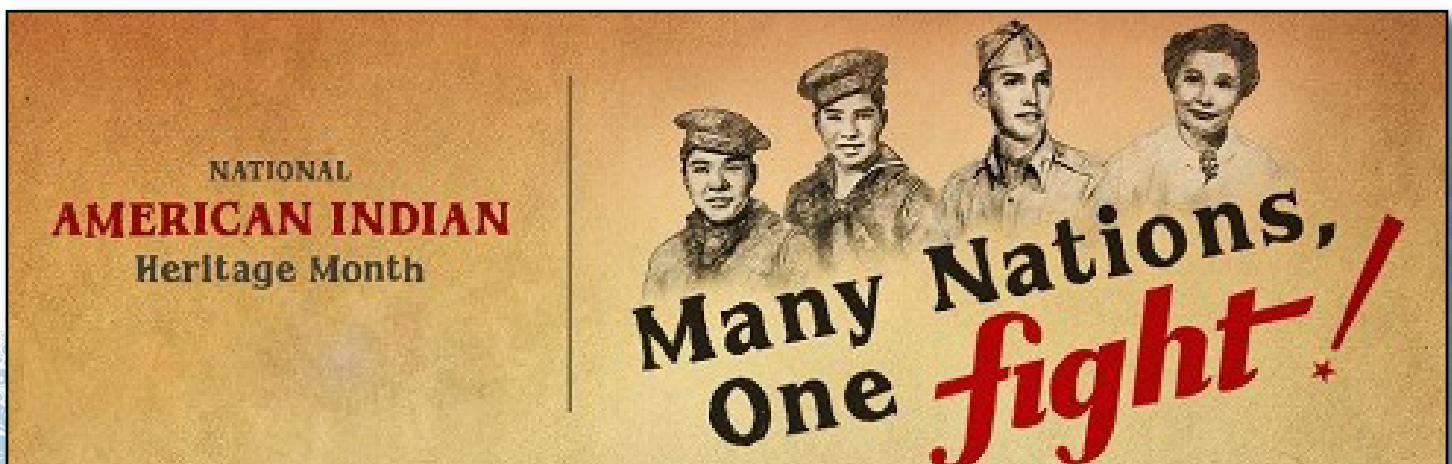

Mekong Delta, killed an unknown number of enemy forces while destroying 65 vessels and disrupting an enemy logistic operation. Williams was awarded the Medal of Honor for his actions during the three-hour battle against Viet Cong guerrillas with the two riverine patrol boats he commanded.

In the early 1970s, Chief of Naval Operations Admiral Elmo Zumwalt sought to reduce racism and sexism in both the Navy and Marine Corps with Z-Gram #66 (Equal Opportunity) which benefited American Indians immensely.

Rear Admiral Michael L. Holmes and Commander John B. Herrington are notable examples of the new opportunities for American Indians as a result of Zumwalt's Z-Gram. Holmes served 32 years as a naval aviator, and Herrington flew for the Navy and later NASA, becoming the first enrolled member of an American Indian tribe to fly in space.

As of 2018, active duty American Indian and Alaska Native military members numbered more than 31,000 with over half in the U.S. Navy. More than 133,000 American Indians call themselves veterans today. ~

*(Courtesy of Naval History and Heritage Command)*

## Winter Safety Message (cont. from page 2)

as to whether light strings are rated for indoor or outdoor use, just check the color-coded UL mark on the product's package. A green holographic UL mark says, "Indoors only, please," while a red one indicates that the product is safe for both indoor and outdoor use.

Whether they are brand-new or seasoned veterans from holidays past, before you put them up, inspect all lights, electric decorations and extension cords for signs of damage to wire insulation, plugs, and bulbs. If cords and plugs are damaged, discard and replace the decoration. Always unplug lights before changing bulbs, replacing fuses, or making any other repairs.

As the holiday season approaches, and most of us look forward to spending Thanksgiving, Christmas and welcoming in the New Year with family and friends, it is important to remain diligent.

Plans will be made and finalized, but please remember it is our responsibility to care and protect our family, friends and co-workers.

Keep in mind the 13-year-old girl that spread the infection to 11 family members from four different states during a family vacation.

There were 14 family members, including the girl, that stayed in the house. They did not practice social distancing or wear face coverings.

Eleven of the family members would later contract symptoms and test positive for COVID-19.

Even though some restrictions are being relaxed, the virus is still present and a danger to our health and well-being.

Travel distance recently changed to 350 miles from our locality, however, close personal contact, 6-feet for prolonged periods (15 minutes or more), confined areas (car, hotel room or smaller spaces), washing your hands frequently, social distancing and avoiding large crowds has not.

None of us wants to social distance from family and friends, or wear face coverings around them for that matter. Don't let your guard down! ~

***Have a safe, happy and healthy holiday season.  
Happy  
Thanksgiving and Merry Christmas!***

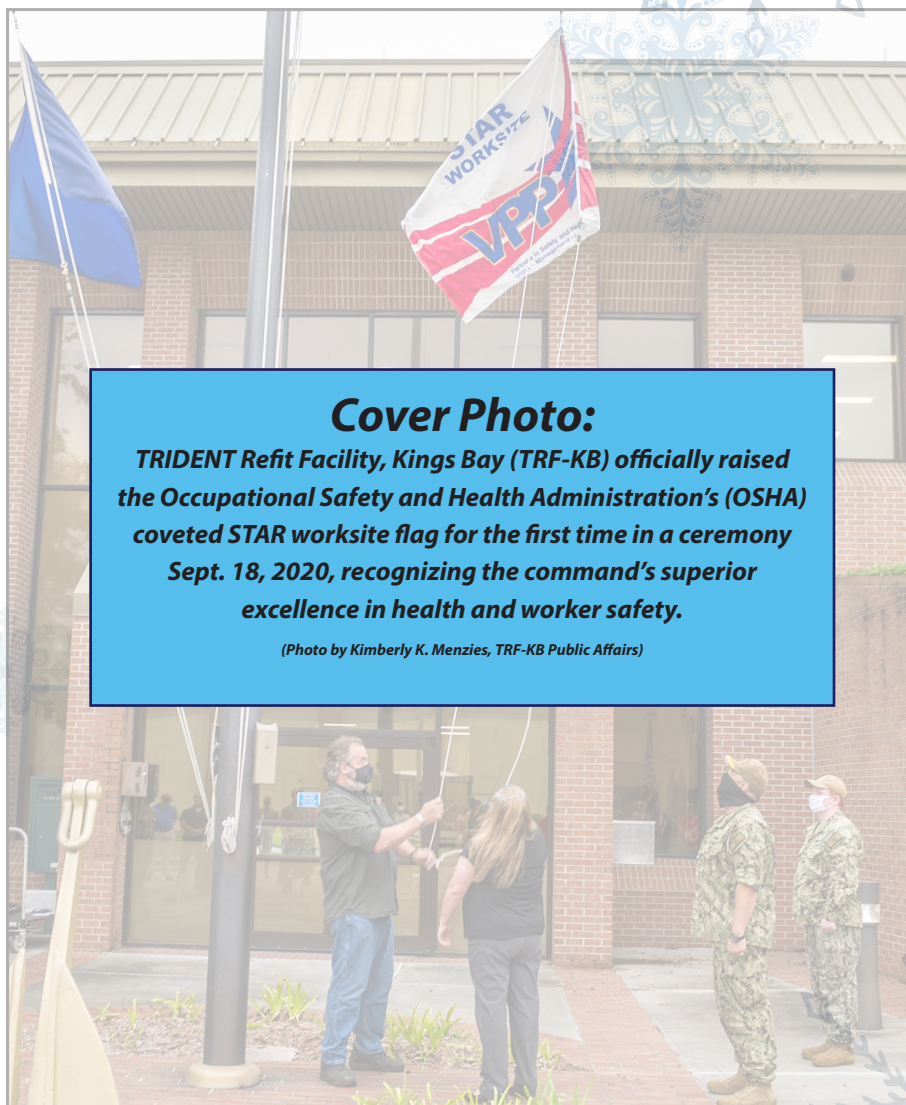

## Elite Safety Achievement (cont. from page 3)

And while the path for TRF-KB to VPP safety excellence has been long, but ultimately rewarding, there's still room for improvement.

"The journey doesn't end with this recognition, but it's a stepping-stone to the next level of excellence," Dolson said. "Other federal agencies and businesses will look to us for best practices and to help guide them in their own journey to achieve VPP STAR status." ~
