Week of June 20th- Headquarters Training & Engagement

Left: SSG Schaffer toasting his burger bun or working on his tan during the Juneteenth MWR

Center: SPC McCullagh, PFC Dill, & CPL Craig at the crew serve range

Right: CPL Craig and SPC Arriaza grilling up some hot dogs and burgers during the Juneteenth MWR

### **Week of June 20th- Headquarters Training & Engagement**

Headquarters platoon was actively engaged in training at the range and motorpool this past week. The pictures above include:

1. PMCS: hands on training on vehicles at the motorpool; something that you need to be doing on a daily basis before, during and after operating a military vehicle
2. Qualified with both the M2 calibers and M240 crew serve weapons at the range

## Storyboard 18-24JUN

### Water PLT “Water-Mutts” by CPL Rivera

Water dogs leading the way again with Ordinance, Finance, Truckers, and MP’s. They don’t call us Mutts for no reason folks...

From troubleshooting PLSs

PMCSing HIPPOS

Hooking Hippo’s/Drivers training

Finally receiving a TWPS

Taking doors of the hinges

Coagulating bad bacteria to the process of purifying

No experience to being the TC leading a convoy online offline.

To learning about CLS and 9-line to save a life

Collectively the Soldiers of the Water Platoon worked tirelessly through the hot days in Texas. They continued to persevere through their challenges together, coming from the junior enlisted to their higher chain of command. Nothing can stop them at this point.

### Week of June 18-24, 2022 – Training & Engagement

POL Platoon actively participated and conducted hands-on training throughout the week. Some of the events pictured above (from left to right) were:

1. PMCS Hands on training on the M978 HEMTT Fuel Tanker, and retail refuel operations.
2. FARP hands on training consisted of testing fuel utilizing an Aqua Glo test kit, strapping and gauging 20K Fuel System Supply Point Bags
3. Virtual Training Convoy Operations. Soldiers of the Fuel platoon were highly engaged in this video game like experience of simulated deployment convoy operations.

## POL Training & Engagement

# A WEEK WITH SUPPLY

Can't Survive Without Supply!

1

## Forklift

The beginning of the week was spent learning about forklifts. We learned about the many wheels and modes the vehicle may operate in during the course, as well as the significance of and need for safety when operating a forklift.

2

## Convoy

Through a game, the convoy offered the soldiers a sense of reality. The soldiers in the game could operate vehicles while completing their tasks. Each soldier played a specific part in the convoy, which was also targeted by gunfire. Because you could die in this situation, it was crucial for them to pay attention to where they were aiming. The convoy was excellent since the soldiers received extra instruction on this topic as well as instruction on how to recognize an IUD.

3

## Warehouse

The Platoon had the chance to work in the warehouse on Wednesday and Thursday. This was not only highly practical, but also very enjoyable and simple. While recognizing the NSN, the soldiers improved picking skills. It was beneficial and the platoon got a chance to actually get a feel of doing their MOS.
