

### Headquarters Platoon at Fort Hood, TX

Left: PFC Brown operating a forklift during forklift training at the motorpool

Center: SPC Bedoya, SPC Sparrow, SPC Iverson and SSG Boerner celebrating their battle buddies birthday's

Right: SPC Ernesto, SPC Bedoya, PFC Cunningham, SPC Iverson & PFC Aviles cooling down after completing PMCS on vehicles at the motorpool

### **Week of June 27th- Headquarters Training & Engagement**

Headquarters platoon was actively engaged in training and CTE mainly at the motorpool this past week.

1. PMCS: hands on training on vehicles at the motorpool
2. Passed the CTE as a platoon to get validated
3. Celebrated SGT Flammer, SSG Gitt & SPC Britt's birthday this past week
4. Completed a forklift training class taught and led by SGT Judge from the supply platoon

## Water Platoon Storyboard 24JUN-01JUL22

“Water-Mutts”

By CPL Rivera, Zaeleem

The bulk of the platoon participated in the CTE at North Fort Hood. They worked through troop leading procedures to prepare for and react to a variety of injects and training scenarios. Eight Water-mutts went on a trip to McAllen, Texas, approximately ten miles from the Mexican border. This intuitive training included a refresher from a small squad from the 916<sup>th</sup> QM BN. This small group of water-mutts were able to pull water, overcoming the unique environmental challenges of a dry Texas summer because nothing stops these water dogs or mutts.

The only thing that can pull the leash on these dogs is the “parking authority” SGT Fuentes. Needless to say, she still gave them a ticket for illegal parking.

252 CSC Water-mutts with 916th OM BN Cadre

Not even “sand storms” can stop these mutts from retrieving the “two wrecked” PLSs.

Putting the wrench down and picking up a water hose. Even “Pops” SSG Cavanaugh appreciates the little things.

PVT Davis, CPL Rivera, and SPC Bucio lead the mutts to put TWPS and LWP together.

## Week of June 27-July 1, 2022 – Training & Engagement

POL Platoon actively participated and conducted hands-on training throughout the week. Some of the events pictured above (from left to right) were:

1. PMCS Hands on training on the M978 HEMTT Fuel Tanker, and retail refuel operations.
2. FARP hands on training consisted of testing fuel utilizing an Aqua Glo test kit, strapping and gauging 20K Fuel System Supply Point Bags.
3. Light Capability Rough Terrain Forklift (LCRTF) drivers training. Soldiers learned hand signals for how to ground guide safely, and how to operate the vehicle.
4. IOTV GEN 4, hands on training consisted of properly placing the SAPI-plates in the correct pockets and, how to properly use the Single-Stage Quick release for emergencies.

# POL Training & Engagement

# Supply !

## Ratchet Strap Training

We divided the Soldiers up this week. The majority went to the motor pool to get hands on experience on how to safely and correctly strap down objects.

## Forklift Training

Supply Platoon had the opportunity to give a block of instruction to the company on the forklift. They learned how to operate the Forklift, and the meanings of the various buttons were taught to the Soldiers during this training. Additionally, they learned how to recognize and use the proper hand signals for this vehicle.

## PGI ( Warehouse)

The other half of the Soldiers went to the warehouse this week. Instead of picking like last week they were taught how to PGI (Post Good Issue).
