# CE WARFIGHTING ETHOS

LEAD | LEAN EFFECTIVE ADAPTIVE DYNAMIC

## LEAN

To defend and win in conflict, Engineers deploy as light and strategically-organized combat support teams, ready to fight beyond the Main Operating Base.

## EFFECTIVE

Conducting training and exercises with our joint partners and host nation allies fortifies our engineering capabilities and strengthens our mission-readiness around the world.

## ADAPTIVE

From prepositioning to “living off the land,” Engineers strategically assess, adjust, and operate with limited equipment, vehicles, and materials for mission continuation.

## DYNAMIC

Engineers are ready at a moment's notice to establish, repair, and move between a network of distributed operating locations.

## READINESS

The pacing challenge is among us and the frontline can shift at a moment's notice, making it imperative for Airmen Engineers to remain a state of readiness – the center of our revitalized CE Warfighting Ethos.
