## Mohan details vision for future Army sustainment

HUNTSVILLE, Ala. – Drawing a vignette set five years in the future, Lt. Gen. Chris Mohan, deputy commanding general and acting commander of Army Materiel Command, addressed attendees March 26 at the Association of the United States Army Global Force Symposium. Mohan painted a picture of future battlefield sustainment and highlighted the Army's progress in achieving that vision. "This is a future state but let me assure you that we are closer now than ever before," Mohan said, adding that to make it a reality, the Army needs industry's help.

## Army's R2E program paves way for future excess removal

ROCK ISLAND ARSENAL, Ill. – While Army Sustainment Command is primarily known for its capabilities in providing Soldiers clothing, equipment, food and more, they're also responsible for the removal, storage and maintenance of many of those same pieces of equipment. Rapid Removal of Excess, or R2E, helps alleviate the burden of excess and obsolete equipment, allowing units to focus their time and energy on training. R2E is a process that removes the burden of excess and obsolete equipment from Soldiers.

## JMC commander briefs future of ammunition industrial base

HUNTSVILLE, Ala. – Brig. Gen. Ronnie Anderson Jr., Joint Munitions Command commander, took to the podium at the Association of the United States Army's Global Force Symposium and Exposition to share his vision on the future of the ammunition industrial base. "Our focus is continuous transformation to modernize munitions production, enhance operational efficiency, and ensure ammunition readiness for the future fight, empowering warfighters with the decisive edge to prevail in any mission," Anderson said.

## USAREUR-AF deputy commander visits APS-2 Coleman

MANNHEIM, Germany – In the past few months several high-ranking military officials and distinguished visitors have conducted key leader engagements and site visits to the Coleman Army Prepositioned Stocks-2 worksite in Mannheim. And for good reason. The Coleman APS-2 worksite is a critical component to U.S. Army Europe and Africa's power projection and warfighter readiness mission. Bernabe's top priority during his key leader engagement and site visit to Coleman March 25 was APS-2 readiness.

## LEAD artisans work together to complete Navy project

CHAMBERSBURG, Pa. – When Naval Sea System Command approached Letterkenny Army Depot leadership about fabricating and assembling complete test stand sets, known as a sponson, for the AN/SLQ-32(V)7 Land-Based System, LEAD artisans jumped at the opportunity and successfully delivered four complete test stand sets in February 2025. The land-based test stands that LEAD fabricated are large, two-story, climate-controlled, steel structures that house integrated electronics and the associated conduit, wiring, hardware and ancillary equipment.

## PEOPLE FIRST – QUALITY OF LIFE UPDATES

### Secretary of the Army visits Fort Bliss

FORT BLISS, Texas – Secretary of the Army Dan Driscoll visited Fort Bliss March 25-26, touring one of the Army's premier power projection platforms for operations, marking his first official visit to the installation since his confirmation. Driscoll also visited Soldier and family housing communities at Fort Bliss, where he was briefed on quality-of-life improvements, including the Department of Defense's new 3D printed barracks, state of the art structures that enhance Soldiers' living conditions and readiness.

### Fort Bragg's \$91 million investment to improve housing

FORT BRAGG, N.C. – Fort Bragg is undergoing an exciting transformation with the launch of the Homestead Project, a \$91 million investment secured through refinancing to enhance on-post family housing. The project includes renovations for more than 1,000 homes, with over 400 homes undergoing full upgrades to increase housing availability for Soldiers and their families.

### Fort Belvoir unveils apartment-style living for single Soldiers

FORT BELVOIR, Va. – The Fort Belvoir command team unveiled a new standard of living for unaccompanied service members. During the ribbon cutting ceremony, Col. David Stewart, Fort Belvoir garrison commander, reinforced a message shared with every Soldier upon arrival to the installation – one that now resonates even more with the new barracks design. The layout result is similar to an off-campus college apartment, providing residents with modern living spaces tailored to their needs.

### Fort Leavenworth breaks ground on Child Development Center

FORT LEAVENWORTH, Kan. – The Newcomb family, representing Child Development Center patrons, helped break ground for a new CDC during a ceremony March 20 at Fort Leavenworth. "The need for high quality, developmentally appropriate care will always exist in our community, and this new CDC will provide that for 6 weeks through 5 years old," said Carole Hoffman, Child and Youth Services coordinator, noting that the new CDC will provide 50 more childcare spaces for that demographic.

### Water plant boost reliability for Soldiers and families in Hawaii

SCHOFIELD BARRACKS, Hawaii – The Hawaii Infrastructure Task Force has completed a major upgrade at the Schofield Barracks water treatment plant, installing new pumps and motors in Building 1575 to ensure a dependable water supply for Soldiers, civilians and families on Oahu. The \$4.6 million project, finalized in March, enhances infrastructure resilience for the military community.

## Military units flock to Tobyhanna for unique training

TOBYHANNA, Pa. – When our American warriors call, Tobyhanna answers with full-scale warfighter support. The Modernization of Enterprise Terminal is a vital communication tool that is an important component of the depot's expansive and critical satellite communications mission. In addition to building and testing these terminals, members of Tobyhanna's civilian workforce offer trainings to make sure warfighters unlock the full potential of the system.

## Garrison enables Soldier readiness for DEFENDER 25

KAISERSLAUTERN, Germany – Soldiers from 30th Medical Brigade's 519th Hospital Center completed an essential Soldier Readiness Program at Rhine Ordnance Barracks, in preparation for an operation supporting Defender Europe 2025. The Soldier Readiness Program is a comprehensive process and is how the Army ensures Soldiers are medically, administratively and logistically prepared for deployment, training and other military duties.

## Skillbridge benefits transitioning Soldiers

KAISERSLAUTERN, Germany – The 405th Army Field Support Brigade is spearheading the Department of Defense Skillbridge program in Europe, both for transitioning Soldiers and for the brigade's Logistics Civil Augmentation Program. Skillbridge is an opportunity for service members to gain valuable real-world civilian work experience through specific industry training, apprenticeships or internships during the last 180 days of their service.

## The communications security audit and inspection program

FORT HUACHUCA, Ariz. – The Communications Security Logistics Activity, known as CSLA, plays a critical role as the Army's COMSEC Commodity Manager and Subject Matter Expert. CSLA's mission is to ensure the security of Army communications by conducting audits and inspections of all COMSEC accounts.

## AMLC Integrated Logistics Support Center holds summit

FORT DETRICK, Md. – Sustainment experts at Army Medical Logistics Command's Integrated Logistics Support Center held a biannual operational summit in February, synchronizing its directorates and focusing on enterprise-wide challenges. The three-day event at AMLC's headquarters featured updates on strategic efforts to address readiness issues and an abbreviated table-top exercise, focusing on ILSC plans and functions.

## APS team demonstrates new gear for defense partners

ZUTENDAAL, Belgium – The Zutendaal Army Prepositioned Stocks-2 maintenance team hosted members of the Dutch Ministry of Defense to observe a grease winch machine demonstration and assist their counterparts with making an informed decision on incorporating the machine at the Eygelshoven APS-2 worksite as a best practice.
