Fort Stewart unveils new food truck plaza

FORT STEWART, Ga. – For Soldiers at Fort Stewart, finding a meal during the duty day can be as simple as walking to a dining facility, trying the installation's newest dining option Flexible Eating and Expanded Dining or eating at the new food truck plaza. The growing number of choices gives 3rd Infantry Division Soldiers the flexibility to find food that fits their schedules, preferences and missions, while remaining on post.

ACC flexibility bolsters US defense capability

SEMBACH, Germany – The 409th Contracting Support Brigade, a subordinate unit to Army Contracting Command, is regionally aligned to U.S. Army Europe and Africa. With its proximity to the ongoing conflict in Ukraine and knowledge of requirements in the U.S. European Command theater, the brigade partnered with U.S. industry operating in Ukraine to procure proven technologies to bolster U.S. defenses.

SMA checks on living conditions, barracks in Hawaii

SCHOFIELD BARRACKS, Hawaii – Sgt. Maj. of the Army Michael Weimer conducted a tour of U.S. Army Garrison Hawaii installations Aug. 13, seeking direct ground truth on infrastructure and quality of life for Soldiers serving at the tip of the spear in the Pacific theater. Though not originally on his itinerary, Weimer added the comprehensive installation tour to personally inspect both new construction and legacy facilities.

Jackson community welcomes 19 new homes

FORT JACKSON, S.C. – Fort Jackson cut the ribbon on new 19 homes during an Aug. 6 ceremony. The new homes are both quad and duplex style homes that range from three-bedroom, two and half baths to four-bedroom, two and half baths. Some are ADA-accessible and have playgrounds nearby designed for children 2 to 12 years old. "Today represents more than the completion of 19 homes," said Theresa Steele, Balfour Beatty Communities vice president.

An enterprise solution to a shared problem

ABERDEEN PROVING GROUND, Md. – In conjunction with their Assistant Secretary of the Army (Acquisition, Logistics, and Technology) partners, U.S. Army Communications-Electronics Command plays an important role in weapon system support, from its logistics analysts to supply chain managers to equipment specialists, across the C5ISR-M portfolio. This is part of an ongoing initiative to place SCRM capabilities in the hands of civilian workforce.
