Fort Bragg to modernize with upcoming CSDV

FORT BRAGG, N.C. – Aimed at improving health and quality of life for service members and the Fort Bragg community, the Army will soon launch a new Campus-Style Dining Venue model on post, converting traditional military dining facilities into dynamic, university-style food hubs. The initiative is part of an ongoing Army-wide effort to overhaul garrison dining options by partnering with commercial culinary contractors, including Compass Group.

Fort Benning to host next-gen nuclear power

FORT BENNING, Ga. – The Army has selected the Fort Benning as one of five initial hosts for its next-gen nuclear power initiative, the Janus Program. This selection followed a comprehensive Army review of industry proposals to ensure selected partners can meet installations' specific operational needs. The Janus Program directly supports executive by deploying advanced nuclear technology to achieve energy resilience and readiness.

Transforming living spaces for Fort Detrick Soldiers

FORT DETRICK, Md. – Garrison leadership, in concert with the senior commander, here is driving a second round of barracks improvement projects to enhance Soldier quality of life, boost morale, improve readiness, and address aging infrastructure. At its core, this initiative embodies the Army's strategic priority: to fortify readiness through dedicated investment in Soldier well-being.

AMLC leverages global excess to boost readiness

FORT DETRICK, Md. – Instead of marking excess or expired medical supplies for disposal, U.S. Army Medical Logistics Command gives divested materiel a critical second life. Excess Class VIII medical supplies are being redirected to support training exercises for both joint forces and reserve components.
