LEADERSHIP RECAP

It has been my distinct privilege to serve as your Executive Director over the past few weeks. I am proud to take the helm during this interim period. As we all know, our vital mission waits for no one, and Team CECOM continues to race ahead!

Over the past two years, CECOM has driven relentless modernization efforts to place our command at the epicenter of tactical readiness. We have accelerated continuous-delivery models, integrated advanced AI through AIAM, and optimized domestic supply chains. By establishing Forward Repair Activity-Medical hubs and engineering rapid process-improvement systems, our workforce continues to deliver superior, enduring advantages directly to our global warfighters.

Looking ahead, we must treat digital networks as primary combat weapon systems where digital readiness is mission readiness. Through critical initiatives like CSOC, Carbon Beach, and microelectronics advancement, we are leading the charge in secure network sustainment. This momentum carries forward with Project IRMA's resilient infrastructure models and AMLC's innovative redirections of excess medical assets to boost joint combat power. Finally, I want to extend my personal appreciation to our G8, contracting, and finance teammates for their outstanding dedication in securing a successful fiscal year close-out.

Mr. Nicholas Saacks
Executive Director, CECOM

From tactical edge to acquisition leadership: Col. Brandon Motte joins CECOM

Olsommer, Tyler newest Tobyhanna Army Depot Employees of the Quarter

Army interns bring AI solutions to CECOM ASIC

HIGHLIGHTS

Critical work of depot professionals celebrated on National Tradesman Day

Tobyhanna, Pa.

Tobyhanna Army Depot wouldn't be the world-class organization it is today without the skill, dedication, and precision of its tradespeople. On National Tradesman Day, Tobyhanna joins our nation in recognizing those who utilize trade skills to make missions successful. Their craftsmanship is the backbone of every successful project, ensuring our warfighters have the tools they need to excel. →

Army MEDLOG transformation effort empowers commanders, closes supply gaps

Joint Base-Lewis McChord, Wash.

The U.S. Army's medical logistics supply chain is undergoing its most significant transformation in decades. The message to commanders is clear: The friction of change is real, but the payoff is true battlefield readiness. In early August, leaders gathered at Joint Base Lewis-McChord for the Medical Logistics in Campaigning, Wave 4A Rehearsal of Concept drill. →

CECOM ILSC plays a key role in enterprise-wide divestiture effort

Aberdeen Proving Ground, Md.

As the Army's transformation continues, the Communications-Electronics Command Integrated Logistics Support Center is employing its expertise to divest legacy equipment, specifically focusing on Warfighter Information Network-Tactical and Tactical Server Infrastructure platforms. This critical divestment of legacy command and control equipment is intrinsically linked to the C2NOW fielding and acceleration Executive Order. →

MOMENTS & MILESTONES

U.S. Army Materiel Command inducted five new members into its Hall of Fame during a Sept. 11 ceremony and plaque unveiling at the command's headquarters. Lt. Gen. Gavin Lawrence, AMC deputy commanding general and acting commander, hosted the induction ceremony, saying, "You have left a legacy of excellence for all of us, and now, you will forever be enshrined as part of the AMC headquarters." The inductees included former CECOM Deputy for Business and Strategic Planning, Frank E. Fiorilli. Mr. Fiorilli was inducted into the Class of 2026 C5ISR Hall of Fame in April 2026. →

CECOM SPOTLIGHT

A U.S. Army Communications-Electronics Command civilian is fulfilling a long-term career goal through a specialized detail assignment focused on modernizing how the command manages, accesses, and shares its critical data assets. **Heather Hamilton**, a data governance and strategy specialist in the Command Chief Data Analytics Office, began her new role in July. Prior to this career pivot, she spent 20 years serving as a technical writer for the CECOM Integrated Logistics Support Center. →
