McAlester partnership advances defense production

MCALESTER, Okla. — The McAlester Army Ammunition Plant in Oklahoma hosted a ribbon cutting ceremony to celebrate a transformative defense production partnership with Perennial Autonomy that develops specialized drones for the battlefield. The partnership is aligned with AMC's modernization of the Organic Industrial Base.

Army MILCON reform to deliver infrastructure faster

WASHINGTON — The Army is launching a comprehensive, phased effort to reform how it plans, designs, acquires and executes military construction projects, with several key initiatives already underway. The Army's transformed MILCON process will focus on four phases: planning; readiness; acquisition and design; and execution. The reform effort addresses longstanding challenges within the Army.

Capacity, partners and the courage to act

FORT BELVOIR, Va. — Every acquisition professional in this workforce has heard some version of the same message over the past year—we must move faster. We've changed structures, authorities, processes and organizations to give ourselves more room to move. We need to understand the operational problem, bring the right expertise to it, make risks visible and decide when the evidence is sufficient to move.

Army maintenance readies Pacific medical equipment

SAGAMI ARMY DEPOT, Japan — A 12-person team from U.S. Army Medical Logistics Command recently completed an eight-week mission in Japan and Korea, inspecting, repairing and validating nearly 2,600 critical medical devices to keep prepositioned equipment ready for rapid deployment across the Pacific theater. The team worked with managers from the Force Projection Directorate.

Detroit Arsenal solar project supports energy resilience

DETROIT ARSENAL, Mich. — U.S. Army Garrison Detroit Arsenal is expanding its infrastructure modernization efforts by utilizing local community agreements to integrate solar energy solutions into ongoing facility upgrades. Since 2022, the garrison has leveraged a strategic Intergovernmental Support Agreement with the neighboring city to deliver public works projects.

USASAC executes \$2B Stryker package for Bulgaria

BULGARIA — Bulgaria's military modernization took a monumental leap forward with the signing of a nearly \$45 million Foreign Military Sales amendment—part of a landmark \$2 billion FMS case—reinforcing NATO's eastern flank. The enterprise uses a hybrid production model in coordination with the principal contractor, General Dynamics Land Systems.
