RED HILL HIGHLIGHTS

50th Edition; Sept. 29, 2026

The mission of Navy Closure Task Force-Red Hill (NCTF-RH) is to execute the permanent decommissioning of the Red Hill Bulk Fuel Storage Facility (RHBFSF) safely and expeditiously, and continue long-term environmental remediation in coordination with State and Federal regulators in order to protect public health and the environment.

FACT CHECK: Following three years of enhanced monitoring and independent regulatory evaluation, the Joint Base Pearl Harbor-Hickam drinking water system remains free of petroleum contamination and continues to meet applicable federal and state safe drinking water standards.

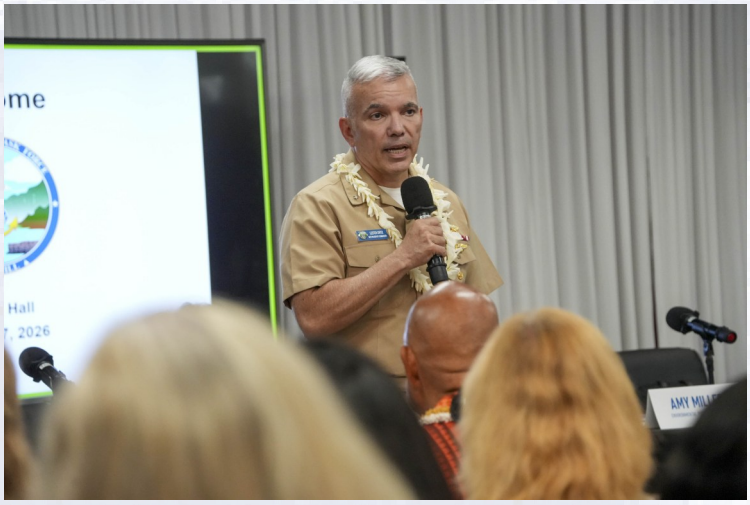

NCTF-RH Hosts Community Town Hall Events

Navy Closure Task Force-Red Hill welcomed community members to town halls on Sept. 15 at the Pearl Harbor Memorial Chapel and Sept. 17 at American Veterans West Oahu Veterans Center. During these engagements, the task force shared updates on continued tank cleaning and pipeline removal work, ongoing environmental investigation, and the return to routine drinking water compliance monitoring following extensive enhanced monitoring conducted in coordination with the Environmental Protection Agency and Hawaii Department of Health.

NCTF-RH appreciates the community's feedback and remains committed to transparent engagement and continued coordination with regulators.

Recordings from both town halls can be found at www.navyclosuretaskforce.navy.mil.
